EMOJI MAKER™ MAKES CREATING ORIGINAL PICTOGRAMS EASY ON NEWEST SHARP MOBILE PHONE

Successful partnership between NAMCO BANDAI and Realeyes3D bring innovative Super Digitizer to Sharp au handsets

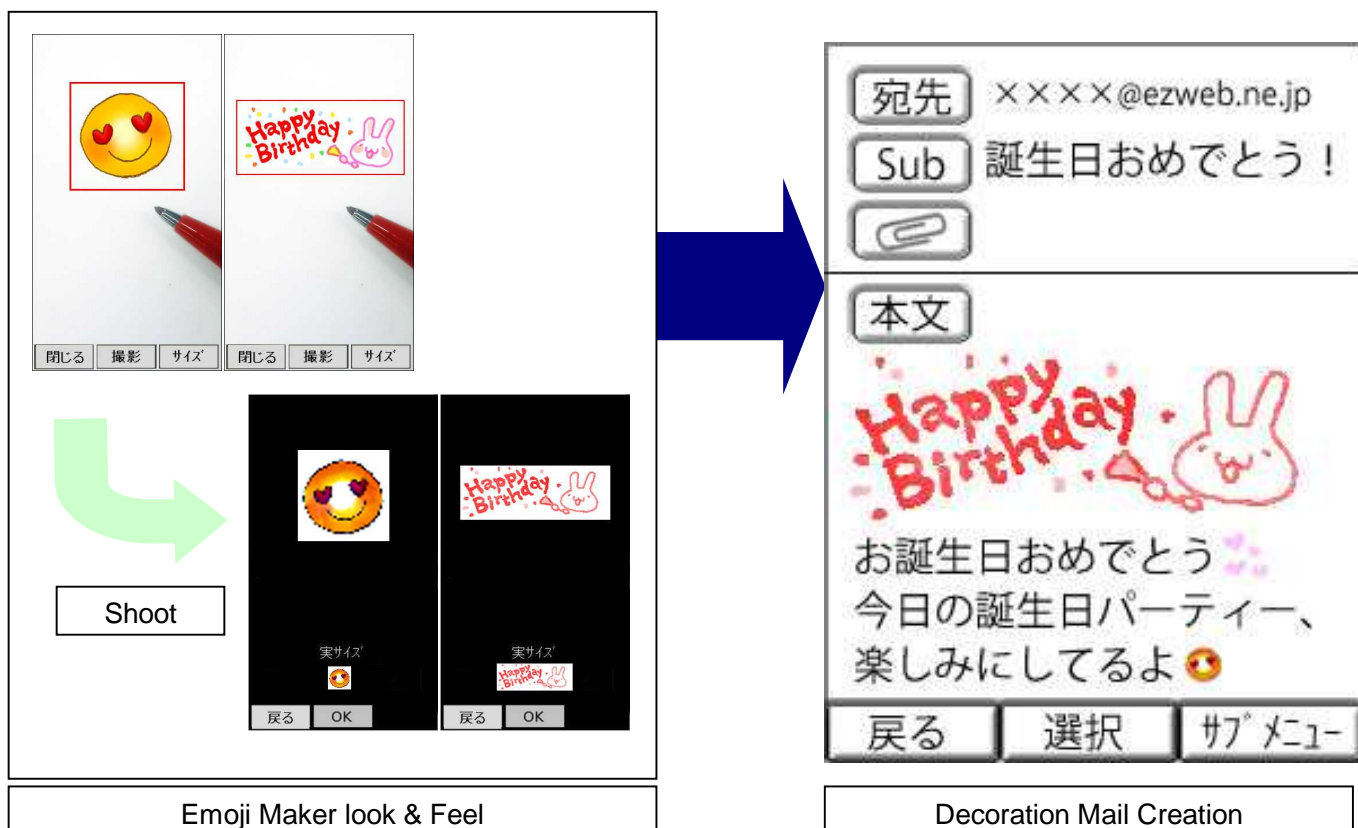

Namco Bandai Games Inc.
Realeyes3D S.A.

NAMCO BANDAI Games Inc. (HQ: Tokyo, President & CEO Shin Unozawa) and Realeyes3D S.A. (HQ: Saint-Cloud (France), President & CEO: Benoît Bergeret, hereinafter “Realeyes3D”) today jointly announced the availability of “Emoji Maker™” on Sharp’s latest au handset model [AQUOS SHOT SH003]. Emoji Maker is an image creation application which results from the successful cooperation of the two companies on the Japanese market. The Sharp SH003 mobile phone is available on October 30th, 2009 from au by KDDI.

Emoji Maker is a version of Super Digitizer Stamp Maker developed specifically for Sharp. It leverages Realeyes3D’s “Visual Cortex™” ink extraction engine, that automatically separates the “ink” it finds in a photo from the background, thus producing unique, scan-quality copies of the information that is written or printed on virtually any support.

Emoji Maker allows users of Sharp au mobile phones to simply draw on a piece of paper the pictogram they would like to add to their library of pictograms. Pictograms created with Emoji Maker are used in decoration mail exactly in the same way as any pre-loaded pictogram.

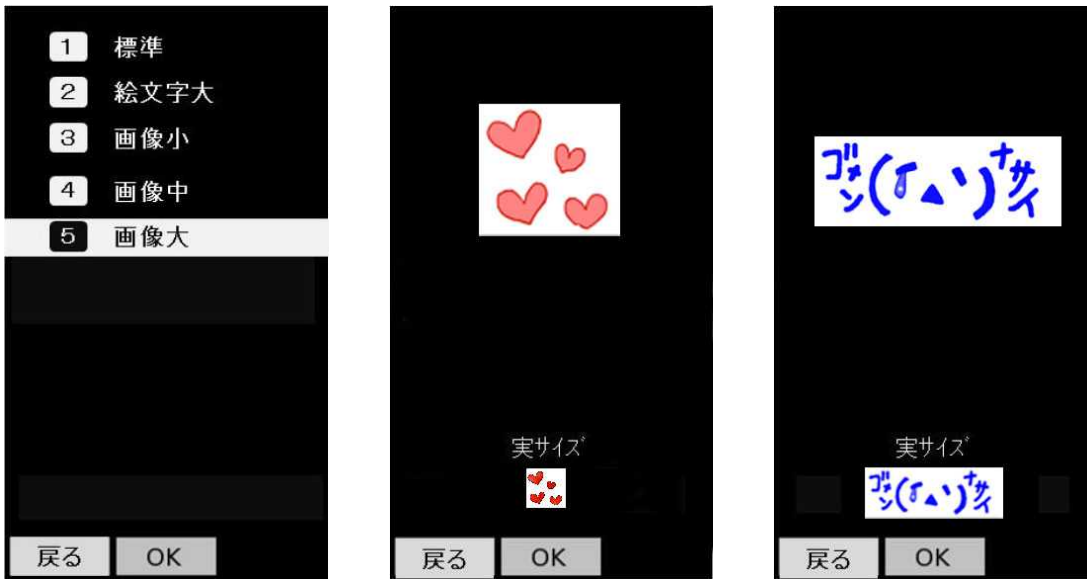

Pictograms created by Emoji Maker are therefore original, unique, and specific to each user. Emoji Makers allow Sharp au phone users to personalize their decoration mails in a way that was not possible before.

[Emoji Maker Features]

Size Selection

You can select from five different sizes.
